

## 2 The Bible - What others believe

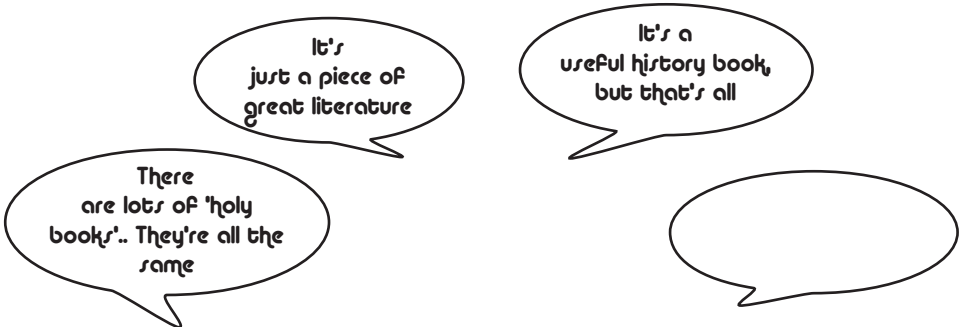

---

'What are we doing, in the 21st century, venerating a book which contains such stuff?'  
(Richard Dawkins)

What would you say to someone who thought it didn't matter?

Some people are vaguely supportive, but they don't like accepting that The Bible is inspired by God.

What would you say to an atheist?

The stories are myths. The people never existed.

I can't believe in miracles

It's a collection of verbal traditions.

It's unscientific

The prophecies were written after the events had happened

It's full of contradictions.

Have most people read the Bible? How can they judge it?
